

GF At-a-Glance

GlobalFoundries Inc. (GF) (Nasdaq: GFS) was formed in 2009 and is the world's largest U.S.-based, independent semiconductor foundry with a global manufacturing footprint. Its fabrication facilities ("fabs") in the U.S., Germany and Singapore manufacture feature-rich semiconductors for the world's leading brands who require these pervasive chips to produce billions of devices, vital electronics, and new technologies that society relies on for mobility, internet of things (IoT), smart devices, communications infrastructure and data center, automotive and other growing markets.

Today, GF is:

- *Focused on semiconductor chips used by 70% of the market, and demand is growing*
- *One of the world's five leading semiconductor manufacturers*
- *A leading "single source" manufacturer*
- *The only independent semiconductor manufacturer with operations on three continents*
- *A "Trusted Foundry" for the U.S. government, with similar designations in Singapore and Dresden including certified international Common Criteria standard (ISO 15408, CC Version 3.1); and*

Headquarters	Malta, New York
President & CEO	Dr. Thomas Caulfield
2021 revenue	\$6.6 billion
Business focus & markets market segments including:	Design, develop and manufacture feature-rich solutions focused on a broad range of <i>-Smart mobile devices</i> <i>-Automotive</i> <i>-Personal computing</i> <i>-Communications infrastructure and datacenter</i> <i>-Home and industrial IoT</i>
Customers	More than 200
Manufacturing locations	U.S. (New York and Vermont), Germany and Singapore
Employees	Approximately 15,000 representing 90 nationalities in 13 countries
Intellectual property	More than 10,000 patents and applications
Ownership	Publicly listed (Nasdaq: GFS), largest shareholder is Mubadala Investment Company
